Indexed in SCOPUS

The JP Journal of Heat and Mass Transfer publishes peer-reviewed articles in heat and mass transfer which enriches basic ideas in this field and provides applicable tools to its users. Articles both theoretical and experimental in nature covering different aspects in the area of heat and mass transfer such as heat transfer in phase change phenomena, machinery and welding operations, porous media and turbulence are considered. Priority is given to those which employ or generate fundamental techniques useful to promote applications in different disciplines of engineering, electronics, communication systems, environmental sciences and climatology. Also, we encourage work on nanoscale heat transfer and information technology having an open area in robotics, digital learning and space sciences. New methods of measuring and/or correlating transport-property data, Energy engineering, Environmental applications of heat and/or mass transfer may also be promoted. Articles concerning their management and business may also be promoted. Beginning from 2007, the journal enters its 25th volume in 2022.

Submission mode: Through e-mail (any format) jphmt@pphmj.com and arun@pphmj.com

Our Policy: Articles received are immediately processed. Once the paper gets through the screening by local team and crosscheck against plagiarism using **iThenticate: Plagiarism Detection Software and peer-review**, it is passed on to the handling Editor who assigns referees with expertise in the field of work in the paper. Referees are requested to provide their reports within a period of three weeks. The reports of the referees help the handling Editor to arrive at a decision. In case of recommendation for revision, the Editor may advise the authors to re-submit their paper after due revision as per suggestions/comments of the referees. The revised paper is again evaluated by the same referees. On receiving the final decision from the Editor, the Editorial office at Prayagraj makes necessary correspondence with the author(s). In case of clear recommendation for publication, the galley proofs of the paper are sent to the corresponding author. After the receipt of the corrected galley proofs, an effort is made to accommodate the paper in an issue to appear next. We understand that the policy of quick decision is in the interest of both the authors as well as the publishers. To ensure speedy publication articles which are sufficiently well presented as are judged by the Editors often get priority. Accepted papers get duly edited and typeset in the style of our journal by the publisher and the galley proofs are sent to the submitting authors.

Article Processing Charges (APC): An open-access journal provides wide range of accessibility to published articles and thus is beneficial to the contributors. However, on account of no subscriptions, etc., the journal suffers financially. To meet the publication standard, peer-review is necessary which requires a lot of correspondences. Also, proper composing and proof-reading costs are to be met. Maintenance of an efficient office is to be afforded. Therefore, we have the Article Processing Charge (APC) for an accepted paper. To defray the publication cost, authors are requested to arrange APC of their accepted papers at the rate of US\$ 30 per page. However, for authors in India this charge is Rs. 1200.00 per page.

We shall be grateful if you encourage us by submitting your valuable original research paper / a critical survey article for the forthcoming issues and also promote our journal amongst your colleagues and fellow-workers.

Expecting to have a favourable response and with kind regards,

Yours sincerely

Arun Azad, General Manager, PPH
