Special Volume 2, ICACCI-2016, Cebu, Philippines
Advanced Computing, Communications and Information Science

EDITORIAL

In the recent years, the rapidly growing areas of advanced computing, communications, and information science have dramatically changed research pattern. This special issue on advanced computing, communications, and information science brings together articles representing emerging applications in these areas.

This special issue is focused on presenting state-of-the-art research results on the application of Advanced Computing, Communications, and Information Science. This is targeted for the innovative and productive discussions on the recent advancement in research and practice in the applications on these areas and future directions.

We would like to thank all the authors who submitted their works to this special issue and many experts who participated in the review process. We are very grateful to the staffs of Pushpa Publishing House for their support in this entire work. We expect this issue will certainly help researchers, academicians, practitioners and industrialists to realize the recent advances and also may help to work in the future directions.
